OBJECTIVE

MCA graduate (results awaited) and B.Sc. Computer Science graduate with hands-on experience building full-stack and AI-powered applications using Java, Python, React, Node.js, Flask, and LLM APIs (Groq). Developed 8+ production-ready projects including multi-user AI assistants, AI-driven ERP systems, and AI blog platforms, backed by certifications in SQL, Data Analysis, Prompt Engineering, and Anthropic Claude/MCP tools. Available for immediate joining with flexibility to relocate anywhere in India for Software Developer / Full-Stack Developer / AI Engineer roles.

EDUCATION

MCA | Avanthi Institute of Engineering & Technology
2024 – 2026 | Status: Final Semester Completed, Results Awaited
Hyderabad

B.Sc. Computer Science | Kakatiya University
Completed 2024 | Warangal

Intermediate | Sri Nalanda Junior College
Completed 2019 | Kothagudem

EXPERIENCE

Fresher - Available for Immediate Joining

Software Developer | Full Stack Developer | AI Engineer | Backend Engineer

Self-Directed Projects: 2024 – Present Open to Relocate

- MCA graduate (results awaited) and B.Sc. graduate with hands-on project experience in full-stack and AI-powered development
- Developed 8+ production-ready applications including AI-powered systems, demonstrating strong CRUD operations and scalable design
- Available for immediate joining with flexibility to relocate anywhere in India

TECHNICAL SKILLS

Languages: Java (OOP, Java 11+), Python, JavaScript, SQL, PL/SQL, C++

AI & LLM: Groq API, LLM Integration (LLaMA), Prompt Engineering, Cloud API Integration

Web Development: React.js (Vite), Node.js, Express.js, Flask, REST API Design, Tailwind CSS

Database: MySQL, PostgreSQL, CRUD Operations, Database Design

Architecture & Tools: Software Architecture, Fault-Tolerant System Design, Git, GitHub, Docker, Postman

CERTIFICATIONS

- SQL and Relational Databases 101
- Data Analysis Using Python
- Deloitte Cyber Security Simulation
- Deloitte Data Analytics Simulation
- Prompt Engineering for Everyone
- Claude Code 101 (Anthropic)
- Claude 101 (Anthropic)
- Claude Code in Action (Anthropic)
- Claude with the Anthropic API (Anthropic)
- Introduction to Model Context Protocol (Anthropic)
- Model Context Protocol: Advanced Topics (Anthropic)
- Complete Prompt Engineering for AI Bootcamp (2026) - Udemy
- The Complete Full-Stack Web Development Bootcamp - Udemy

KEY STRENGTHS

- Quick learner with self-directed learning approach and passion for technology
- Immediate joiner with flexibility to relocate to major tech hubs
- Strong focus on writing clean, scalable, and maintainable code
- Experience with Java Collections Framework, Stream API, and OOP principles

PROJECTS

AI Projects

Panda AI — Multi-User AI Assistant Platform
Flask, Python, Groq API, REST APIs

- Built multi-user AI assistant with real-time search grounding and multimodal file processing (PDF, image, audio, video)
- Designed multi-provider fallback architecture achieving zero-cost, high-availability deployment

Universal AI-Powered Resource & Budget ERP System
Java, Groq LLM, REST API

- Built multi-domain ERP system with AI engine for business insights, auto-reordering, and fraud detection
- Developed REST API and browser dashboard supporting concurrent multi-user sessions

AI Blog Platform

React, Express, Groq LLaMA API

- Built AI blog platform with content generation, SEO automation, and context-aware RAG chatbot
- Designed security-first architecture keeping API keys server-side only

Java Projects

Inventory Management System

Java, Java Swing, ArrayList, OOP

- Developed GUI-based system using Java Swing with real-time data visualization through JTables
- Implemented automated profit/stock calculations and Low Stock Alert with transaction logging

E-Commerce Shopping Console Application

Java, MySQL, Collections Framework

- Built shopping simulation with dynamic cart, product catalog, and secure wallet payment system
- Implemented automated stock updates applying OOP principles for clean code architecture

HTML Projects

WaveCoin — Decentralized Token Application

Motoko, Internet Computer (ICP), DFX

- Implemented custom cryptocurrency logic for minting and transferring tokens on the blockchain
- Successfully deployed canisters and integrated a frontend for real-time balance tracking

PeakNFT — NFT Minting Platform

React.js, Solidity/Motoko, IPFS

- Developed a platform to mint and manage unique digital assets (NFTs) with decentralized storage for metadata
- Integrated wallet connectivity for secure user transactions

Advanced React Blog Platform

React.js, Node.js, Express, PostgreSQL/MongoDB

- Built a complete CRUD application with secure user authentication and session management
